How do I limit what a patron sees in the Outstanding Requests in ILLiad?

Last updated: Thu, 01 Aug 2019 15:32:51 GMT

**Symptom**

- You want to limit what information is produced in the output that a patron sees so they do not see it, or what they see is what you want them to see in the Outstanding Requests

**Applies to**

- ILLiad

**Resolution**

You can limit what a patron sees or decide what a patron sees in the Tables that show up on different Web Pages such as Outstanding Requests. Here are the two different areas you can look at for more information:

1. **Display Statuses.** You can limit what the patron sees for the Transaction Status from the [Creating Display Statuses](https://help.oclc.org/Resource_Sharing/ILLiad/Troubleshooting/Creating_Display_Statuses) documentation.
2. **Table Tags.** You can control what Columns will display in a table in the [Table Tags](https://help.oclc.org/Resource_Sharing/ILLiad/Troubleshooting/Table_Tags) documentation.
