When we are using Digital Collection Gateway, can we add our work manually?

Last updated: Fri, 02 Aug 2019 18:57:06 GMT

Applies to

- Digital Collection Gateway

Answer

Digital Collection Gateway is an automated harvesting tool that searches a repository URL and crosswalks the metadata found through predetermined mapping into WorldCat, creating a record. Because Digital Collection Gateway is an automation, there is no manual way to add records using Digital Collection Gateway.

The only way to add work to Digital Collection Gateway is to add it into your repository collection and have Digital Collection Gateway harvest from that URL.
