I am getting an error message when I click on an item in the NO ILL Number Match field and I need to fix it

Last updated: Tue, 31 Mar 2020 17:44:45 GMT

Symptom

- When you click on the No ILL Number Match field, you are getting an error message pop-up that asks you to save feedback

Applies to

- ILLiad

Resolution

Here are a couple of steps you can take to fix the issue:

1. You need to clear the Electronic Delivery Form following the directions in the Manually Clearing the Electronic Delivery Processing Form documentation.

2. Try to process the request again. If you get the same error message, then you will need to contact your SQL Server Administrator if you are self-hosted or OCLC Support if OCLC hosts you and give the number you see in ILLiad, for example, O3465 (that is the letter "O" and not a zero "0").

3. If OCLC hosts you, we will update the OdysseyReceived table so that O3465 does not show up.

4. If you are self-hosted, here is the list of command the SQL Administrator will need to use to update the OdysseyReceived table:

   ```sql
   UPDATE OdysseyReceived
   SET status='Received'
   WHERE ID='3465'
   go
   ```

5. Next, you will want to open up the ILLiad Client and follow the documentation on Manually Clearing the Electronic Delivery Processing Form.

   You will need to open the Electronic Processing window again, and the O3465 entry will no longer be there and you will not get an error message processing Electronic Delivery.
