Add LHRs to a work list

Last updated: Fri, 14 Jan 2022 15:42:35 GMT

Discover how to add LHRs to a record work list using barcodes, control numbers, or search results.

Add selected LHRs to a work list

1. In the left navigation, select Local Holdings Records from the Data Type drop-down list.
2. Select an index from the Index drop-down list.
3. Enter your search terms in the Term(s) text field. The text field will expand to fit your search terms, if needed.
4. Click Search.
5. Select the LHR(s) you want to add to your work list.
   ◦ Select the check box at the top of the results table to select all records on the current page.
   ◦ Use the navigation buttons to select records across pages.
6. Click Selected Records from the Send to Record Work List drop-down menu. The Send to Record Work List dialog window opens.
7. From the Send to Record Work List dialog window, select the record work list to which you want to send the LHR(s). The Send to Record Work List dialog window displays the following for each available record work list:
   ◦ Current Record(s) in Work List – The number of records currently in the selected record work list.
   ◦ Record(s) Being Sent – The number of records selected to be sent to the selected record work list.
   ◦ Maximum Allowed – The maximum number of records allowed in the selected record work list.
8. Click Send. You will receive a confirmation message once the record(s) has been added.

Add all LHRs in a search results list to a work list

1. In the left navigation, select Local Holdings Records from the Data Type drop-down list.
2. Select an index from the Index drop-down list.
3. Enter your search terms in the Term(s) text field. The text field will expand to fit your search terms, if needed.
4. Click Search.
5. Select All Records from the Send to Record Work List drop-down menu to send all records in your search results to your work list. The Send to Record Work List dialog window opens.
   Note: The system will only attempt to add target records for the first 9,000 records in your results list.
6. From the Send to Record Work List dialog window, select the record work list to which you want to send the LHR(s). The Send to Record Work List dialog window displays the following for each available record work list:
   ◦ Current Record(s) in Work List – The number of records currently in the selected record work list.
   ◦ Record(s) Being Sent – The number of records selected to be sent to the selected record work list.
   ◦ Maximum Allowed – The maximum number of records allowed in the selected record work list.
7. Click Send. You will receive a confirmation message once the record(s) has been added.
Add LHRs to a work list using control numbers

Note: You must use the LHR control number, rather than the bibliographic OCLC number, when using this method.

1. In the left navigation, click **Record Work Lists**.
2. From the LHR tab, click the **Record Work List ID** for the record work list to which you would like to add records. The LHR - Record Work List screen opens.
3. From the LHR - Record Work List screen, click **Actions > Add > Target Records Using Control Numbers**. The Add Target Record(s) Using Barcode(s) dialog window opens.
4. Enter **control numbers**, separated by a space, comma, or line return, in the Add Target Record(s) Using Control Number(s) dialog window.
5. Click **Add** to add the records to the record work list. The system will only attempt to add target records for the first 9,000 control numbers entered.

Add LHRs to a work list using barcodes

1. In the left navigation, click **Record Work Lists**.
2. From the LHR tab, click the **Record Work List ID** for the record work list to which you would like to add records. The LHR - Record Work List screen opens.
3. From the LHR - Record Work List screen, click **Actions > Add > Target Records Using Barcodes**. The Add Target Record(s) Using Barcode(s) dialog window opens.
4. Scan or enter **barcodes**, separated by a space, comma, or line return, in the Add Target Record(s) Using Barcode(s) dialog window.
5. Click **Add** to add the records to the record work list. The system will only attempt to add target records for the first 25,000 barcodes entered.
