Introduction

The August WorldCat Discovery release ensures all supported languages have a consistent experience in WorldCat Discovery. The release also includes small changes to Course Reserves and patron accounts.

Include Request ID with problem reports

When reporting an issue with WorldCat Discovery, it is extremely helpful to include the Request ID. The Request ID is found at the bottom of the screen on which the issue occurred. Including this information allows us to directly trace what happened on the request we are troubleshooting.

Bug Fixes

Local Bibliographic Data notes display in detailed views for all supported languages

When metadata in languages such as Korean, Arabic, Hebrew, and others is entered into local bibliographic data fields that display in WorldCat Discovery, this metadata now displays to users. Prior to this release, metadata from these languages displayed only if it was linked to a field that contained Latin text. To see more information on the display of local bibliographic data fields in WorldCat Discovery please see this documentation.
Family names display first in 1xx and 7xx fields for all supported languages

In some cases when there is a name in languages like Korean, Chinese, Japanese, etc. in the 1xx or 7xx without a linked Latin counterpart, WorldCat Discovery will now display the author family name first as it is entered in the 1xx or 7xx field of the MARC record.

Custom Database groups correctly display text for all supported languages

In the Service Config > Metasearch Content > Default Databases and Licensed Content, you can now create custom database groups with characters from all supported languages including Chinese, Japanese, Korean. Prior to this release the custom group names displayed as question marks from some characters.

Course Reserves lists display in alpha order

Users looking for items in their institution’s Course Reserves will now be able to quickly locate items in an alphabetized list rather than searching the entire list. Items added to courses will be sorted alphanumerically within each course.

Correct status description appears in My Library Account

When items are checked out, the correct status description will display. Prior to this release, some users saw incorrect descriptions. For example, the description “Item is due tomorrow” would display for items due the same day.

New content

This is a list of new databases added to WorldCat Discovery, WorldCat Local and WorldCat.org since our last update.

You can enable these databases as search options in the Licensed Content and Databases module of the OCLC Service Configuration site. Please remember that your library must have a valid subscription to these databases in order to enable them.

Available in WorldCat Discovery and WorldCat.org

From Alexander Street

Academic Video Online: Eastern Edition- A collection of videos spanning wide subject areas including anthropology, business, counseling, film, health, history, music, and more.
