Is it possible to generate URLs to WorldCat.org that search by ISBN, ISSN, and Title?

Applies to
  • WorldCat.org

Answer
Below are link constructs that can be used to search WorldCat.org by title, ISBN, or ISSN. Please note that due to the amount of records housed in WorldCat.org the result may not pull back the expected item:

ISSN: https://www.worldcat.org/issn/
Title: https://www.worldcat.org/title/[item title]
