How do I disable TLS 1.1 on my ILLiad Web Server?

Last updated: Thu, 19 Dec 2019 15:34:27 GMT

Symptom

- You want to disable TLS 1.1 and you are on ILLiad 9.0 or higher

Applies to

- ILLiad

Resolution

You will need to look up Microsoft articles about how to Disable TLS 1.1 from their Support site at [Welcome to Microsoft Support](https://support.microsoft.com). You can disable TLS 1.1 and 1.0 because TLS 1.2 is supported in ILLiad 9.0 and above. To learn more about the TLS security updates at OCLC, click here.
