Find the administrative roles needed to access the Admin module.
In order to access the Admin module, you need to have an administrative role assigned to your account. When you first subscribe to a WorldShare service, an account with administrative roles is created for a staff member at your institution. That staff member can create users and assign roles to users in order to provide other staff members with administrative access.

If you need help creating a new account or adding services to an existing account, contact your WorldShare administrator or contact OCLC Order services.

You need to have at least one of the following roles assigned to your account in order to access the Admin module:

- ACQUISITIONS_ADMIN
- Cataloging INST Admin
- CIRCULATION_ADMIN
- ERM_ADMIN
- ERM_SUPERVISOR
- KB_ADMIN
- USER_ADMIN
- WC Discovery Admin
- WORLDSHARE_ILL_ADMIN
