Why am I receiving an error when renewing an item from a previous budget?

Symptom

- Receiving error when renewing

Applies to

- WorldShare Acquisitions

Resolution

The location of the items on the previous budget have either changed, or the locations have since been removed. You will need to ensure the location on the items is updated so that they can be renewed.

Additional information

If updating the locations still causes an error, please contact OCLC Support with your OCLC symbol, the order number, and the item which is receiving the error.
