Does Collection Manager update WorldCat holdings for all customized knowledge base collections?

Last updated: Tue, 02 Nov 2021 22:03:26 GMT

Applies to

- WorldShare Collection Manager

Answer

Depending on what type of customized collection is being referred to.

- Global collections are customized, so if you have selected titles within a customized collection, your holdings & titles will be updated. For example, if a title is superseded by a later imprint, this will be updated in your collection.

- However, if you have created your own custom Knowledge base collection, from a set of titles yourself, this will not be updated.

- Local collections are maintained locally - Therefore if a title is superseded, it will be up to the library to locate the later imprint to replace the superseded one.
