Migrating this data is optional.

An OCLC non-bibliographic data analyst will work with you.

For example, Item stats can include:

- a count of the number of issues for each individual item record – “Issue Count”
- the date the item was last loaned – “Last Loan Date”
- the barcode of the user who last loaned the item - "Last Borrower Barcode"
- loan count year to date - "Loan Count YTD"

If needed, further information is always available:
