Add Request

Last updated: Mon, 10 Feb 2020 20:54:44 GMT

Find information about the AddRequest service URL, JSON elements, and Request templates and examples.

AddRequest service URL:

http://HOSTNAME/portal-service/request/add?aid=${aid}

where ${aid} is the authorization id for the user logged in. The {aid} is provided by the Authentication service.

For example:

http://HOSTNAME/dws/item/available?aid=YkbOGfBGv6hKLefABkWJP2yYII8

HTTP method: POST

HTTP Header Content-Type: application/json

HTTP Header User-Agent: ${user-agent}

Standard http clients (browser, http client libraries etc.) will automatically include it's User-Agent value. See Authentication for more information.

AddRequest request body: JSON elements

Request template and examples

The following templates are examples that can be downloaded:

- AddRequest request template
- AddRequest request example- book
- AddRequest request example- article

AddRequest response: JSON elements

The response from this service is a JSON string.

- **RequestNumber**: The request number assigned by Relais.
- **ConfirmMessage**: As configured for your library.

The following is a sample response for a successful request:

```json
{
    "RequestNumber": "REG-10000079",
    "ConfirmMessage": "Your request has been submitted (Request Number: REG-10000079)"
}
```

Errors

The following is a sample response for an unsuccessful request:

```json
{
    "Problem":{
        "ErrorCode":"PUBAR001",
        "ErrorMessage":"Missing parameter :Title is required"
    }
}
```

This service may return the following error codes and messages:
