Find information about using the Relais Sandbox for testing. The sandbox is to assist libraries and other vendors who want to test

- various Relais web services prior to implementing them in production systems, e.g., a local library catalog or discovery platform.
- redirect from a discovery platform to Relais D2D Discovery
- embed Relais D2D Discovery as part of another discovery platform

**Before using the sandbox.**

Review the documentation for the web service that you will be using for more details.

Contact [OCLC Relais Support](https://help.oclc.org/Resource_Sharing/Relais_D2D/Relais_Discovery_web_services/Sandbox) for a patron id and password (if needed) and an API key.

Determine which configuration to use based on your local configuration for Relais D2D.

**What to expect when using the sandbox.**

**Targets configured**

A representative series of catalogs and locations have been configured in the sandbox. Results from these targets will be retrieved and used.

- Aleph
- Alma
- Horizon
- Koha
- Millennium
- Ole
- Polaris
- Sierra
- Symphony
- TLC
- Voyager
- WMS
Library symbols/patron ids

A series of library symbols have been configured for testing purposes. Contact Relais support for a patron id (and password if needed) for testing purposes. The appropriate combination to use is dependent on the configuration that you are using.
