In ILLiad, how do I change my Lender Address table so the Lender strings are all Uppercase?

Last updated: Thu, 17 Oct 2019 15:40:00 GMT

Symptom

- You want to know how to change to Uppercase for all the Lender Strings in the Lender Address table

Applies to

- ILLiad

Resolution

It is best to run the SQL command to update the keys.

1. If you are on a single server, then you will want your SQL Administrator to use this query:

   ```
   UPDATE LenderAddresses
   SET Lenderstring = UPPER(Lenderstring)
   
   go
   ```

2. If you are on a Shared server, and you want it done for all the sites, then you use this query:

   ```
   UPDATE LenderAddressesALL
   SET Lenderstring = UPPER(Lenderstring)
   
   go
   ```

3. If you are hosted by OCLC, contact OCLC Support.
