License Key Expired too far in the future

Last updated: Mon, 28 Oct 2019 18:20:04 GMT

Symptom

- After Upgrading to version 6.6.2 you get the following error message: Current license key expired on 2019-12-31 09:00:00 (too far in future; clock issue).

Applies to

- EZproxy version 6.6.2

Resolution

To resolve this you will need to reapply your EZproxy WSkey using the steps below:

1. Log onto your EZproxy Server.
2. Stop EZproxy from running as a service.
3. Remove EZproxy as a service.
4. Install your EZproxy WSkey:
   - Windows Command:
     ```
     ezproxy -k 123456789101112
     ```
   - Linux Command (Must be run as root):
     ```
     ./ezproxy -k 123456789101112
     ```
5. Add EZproxy back as a service.

After this has been completed the message should go away.
