When a patron registers, what form shows up on the Web?

Symptom

- You want to know what form opens up when your patron is registering

Applies to

- ILLiad

Resolution

Here are the different forms based upon the Authentication Method:

1. ILLiad Authentication will use the NewUserRegistration.html web page.
2. The rest of the Authentication methods will use the NewAuthRegistration.html web page. If you do not have the NewAuthRegistration.html web page, ILLiad will go to the ChangeUserInformation.html web page. The authentication methods are:
   A. ILLiad Exclusive Authentication.
   B. LDAP Authentication.
   C. RemoteAuth Authentication
   D. PatronAPI Authentication.
   E. Symphony API Authentication.
