Why are there different search results when searching First Search vs. searching in WorldCat Discovery?

Last updated: Tue, 05 Nov 2019 18:31:14 GMT

Applies to
- WorldCat Discovery
- FirstSearch

Answer
This is because the search engine used for FirstSearch WorldCat and WorldCat Discovery is different. The results will not be exactly the same. WorldCat Discovery applies FRBR logic to searches and FirstSearch does not.

Additional information
For more information regarding differences in FirstSearch and WorldCat Discovery see FirstSearch and WorldCat Discovery index differences.
