New Procedure for updating ISO in ILLiad 9.1

Symptom

- If you are using ISO ILL, there is a new process for updating in 9.1

Applies to

- ILLiad

Resolution

Please follow the instructions in the [9.1 ISO Service Upgrade](https://help.oclc.org/Resource_Sharing/ILLiad/Troubleshooting/New_Procedure_for_updating_ISO_in_ILLiad_9.1). If you are hosted by OCLC, we will take care of this process if you are using ISO ILL. Please note, you cannot use Powershell II to run the update. You need to run Powershell v. 1. The link should be something like this for Powershell:

```
C:\Windows\System32\WindowsPowerShell\v1.0\powershell.exe
```
