Why does Connexion prompt each record when batch exporting via the OCLC Gateway and MARC Listener to Sirsi Symphony?

Last updated: Mon, 23 Dec 2019 19:38:17 GMT

Symptom

- Connexion is requiring that you "Okay" each record rather than processing all of them, per the batch process

Applies to

- Connexion Client

Resolution

Per Sirsi Symphony's documentation (Step 11), the ILS returns a message to Connexion confirming the status of the exported record. Despite Connexion being capable of batch exporting to an ISL, Sirsi Symphony by default replies back with the status of each record. This cannot be disabled in Connexion.

Please contact Sirsi and inquire if this message can be disabled.

Additional information

The following is the message Sirsi Symphony will send back to Connexion:

MARC Listener policy selected: NEW_ISBN

Symphony Catalog MARC Load 3.5.3 started on Tuesday, June 12, 2018. 2:15 PM

1 callnum(s) created.
1 bib record(s) read.
1 bib record(s) loaded.

Symphony Catalog MARC Load finished on Tuesday, June 12, 2018. 2:15 PM

Loaded record's catalog key: 123456

Title of loaded record: Test Title
