Why am I receiving an Invalid input Time (hh:mm): required error when setting up an automated job?

Last updated: Mon, 06 Jan 2020 19:20:42 GMT

Symptom

- Invalid input Time (hh:mm): required error

Applies to

- WorldShare Acquisitions

Resolution

You will need to ensure the hours and minutes are entered correctly, as well as whether you have it set to AM or PM. This will be entered in the Time (hh:mm) section of the job. You will need to click into each section of the time and enter the information, ex. -- : -- -- becomes 10:30 AM.
