Find tables containing the different fields which are available for export for Borrowing and Lending queues in Tipasa. There are two different types export files: Borrowing and Lending. Borrowing and Lending exports contain different fields. See the tables below for more information. Each of the fields corresponds to the different column headings in the CSV file.

Fields appear in the file in the order they appear on the request form in Tipasa. For example, if you are exporting Borrowing data, the Request Details will appear first, then Borrowing Library, then Patron. Dates appear in the format YYYYMMDD. Note: PATRONNAME is only one field, but contains the first and last name of the patron. SUPPLIERNAMESPACE is the symbol of the lending library on ILL requests, but for Purchase requests, this field is the vendor.

## Borrowing

For queues under the categories: Borrowing Requests, Document Delivery, and Purchasing Requests.
