Change Password does not display the correct message in 9.1

Last updated: Tue, 21 Jan 2020 22:55:57 GMT

Symptom

- When a user first logs in and has to change their password

Applies to

- When staff force a password from the client for a web user, pressing the submit button successfully changes the password, BUT it reloads the change password page with blank values and without a status message stating the password has been successfully changed.

Resolution

The user clicks submit and gets an error but the password is successfully changed in ILLiad.
