How to use these exercises

OCLC's hands-on training exercises are designed to give you an opportunity to practice building your skills while working in a safe environment.

These interactive exercises can help you learn a new service, teach a new staff member how to use a service, and can also prepare you with basic knowledge about a service prior to taking one of our instructor-led courses.

WorldCat records (for WMS libraries)

This self-paced tutorial is for catalogers and other technical services staff in libraries using WorldShare Acquisitions and Circulation in conjunction with WorldShare Record Manager and WorldCat Discovery. You will learn about WorldCat records and associated concepts.

WorldCat records (for WMS libraries)

After completing the exercise, please take a few moments to complete this brief survey.
