How can I see how many holdings we have by format in WorldCat?

Last updated: Thu, 30 Jan 2020 22:50:28 GMT

Applies to

- Record Manager

Answer

In Record Manager, you can search for your holdings by using the query li:[OCLC Symbol]. This will pull all records that your library holds and you will be able to narrow down by the format in the Record Manager interface. The amount of total records, and the amount of records per format, will also be shown in the interface once the search is done.
