When sending ILLiad articles through Lendng, is there a copy of what was sent kept on the server?

Last updated: Wed, 05 Feb 2020 16:30:20 GMT

**Symptom**

- You want to know if there is a copy of the article sent on the Web Server to compare what was sent and what was received by the borrowing library

**Applies to**

- ILLiad

**Resolution**

There is not a copy of the article saved on the Web Server. The only time a copy is saved is if the sending failed. On the web Server, the default location is in the c:\ILLiad\sent\failed folder.

**Page ID**
