Can ILLiad user SIP2 username with a barcode as the Username?

Last updated: Fri, 07 Feb 2020 16:42:08 GMT

Symptom

- You use SIP2, that ILLiad retains the UserID (primary key) of the patron record and saves it rather than depending on a simple barcode

Applies to

- ILLiad

Resolution

ILLiad only uses one Username, so you can either use the barcode and SIP2 will not work, or you can use the SIP2 username and the barcode will not work. ILLiad does not use Aliases.
