What is FAST?

Symptom

- You found a FAST heading and want to know what it is.

Applies to

- Connexion
- Record Manager

Resolution

FAST is short for Faceted Application of Subject Terminology. It's a series of eight modular, complementary vocabularies derived from the Library of Congress Subject Headings (LCSH) and developed to meet the need for a general-use subject terminology scheme that supports faceted retrieval. We have more detailed information on it and it can be searched.
