How can I tell if a link is from the WorldCat Knowledgebase or is a DOI link?

Last updated: Mon, 06 Jul 2020 16:32:51 GMT

Applies to

- WorldCat Discovery
- WorldShare Collection Manager

Answer

If a link is from the WorldCat knowledge base, you will note the collection and link information is listed with the link in WorldCat Discovery. If this information is not listed and you do not see the link in the MARC record, please contact OCLC Support for assistance in determining the origin of the link.

If it is a DOI link, it is likely from Unpaywall and you will need to contact Unpaywall directly to have the link corrected.

Additional information

See [Open content in WorldCat Discovery search results](https://help.oclc.org/Discovery_and_Reference/WorldCat_Discovery/Troubleshooting/I_want_to_report_a_broken…) for more information regarding Unpaywall.

Please see [Links from DOI](https://help.oclc.org/Discovery_and_Reference/WorldCat_Discovery/Troubleshooting/I_want_to_report_a_broken…) for more information on DOI display in WorldCat Discovery.
