We see a message about "Digby Limit Reached". What is the Limit, and how would we share the list before removing it?

Answer

The limit of items stored in the device is 1000 inventoried items. Once this limit is reached, you get the warning. To share the list, tap the "Share" icon on the toolbar. This will allow you to export the inventoried report (as an Excel spreadsheet) and send it to and email address, text it, airdrop it, etc.
