Cannot maximize (re-display) Connexion client from a minimized position in the task bar

Last updated: Thu, 05 Mar 2020 14:59:46 GMT

Symptom

- In Connexion client you are unable to maximize the client from the task bar icon

Applies to

- Connexion client

Resolution

When you minimize the Connexion client, it becomes an icon in the task bar on your desktop, and you should be able to maximize (re-display) it by clicking the icon. If you are unable to maximize the client from the task bar icon, use the following workaround.

Workaround: Click the Connexion client icon in the task bar, and then press and hold the Windows key (\(\text{\textbf{H}}\)) on your keyboard while you click the \(<\text{Up arrow}>\) key.
