OLB-12848

Barcoding at Check-in is not creating the copy and checking the item in.

This has been remedied. Additionally, when entering a barcode, the user does not have to set "Create Copy" to "Yes", nor do they need to specify a number being checked in as this will be treated as 1 for each barcode entered.

North East Scotland College

OLB-15278

When attempting to find a multi-part volume Order Item to attach to an Invoice Item the search fails.
