Can I use the TestWeb site while using Remote Authentication in ILLiad?

Last updated: Mon, 20 Apr 2020 13:28:48 GMT

Symptom

- Can I use Test Web while using Remote Authentication in ILLiad?

Applies to

- ILLiad

Resolution

It is not possible to use test web while using Remote Authentication. This is due to the system being designed to use Remote Authentication based on the location of the default web pages which are determined by the RemoteAuthWebPath customization key in the Customization Manager. This is why it is not possible to use the test web pages with Remote Authentication.
