Can Report Designer be used to create a report showing the amount of titles and their material types in each shelving location?

Last updated: Mon, 15 Jun 2020 18:55:37 GMT

Applies to

- WorldShare Analytics

Answer

Yes. Using the LHR Item Detail Universe, add the following data points:

- LHR Item Count
- LHR Item Permanent Shelving Location
- Material Format

This will generate a report breaking down how many items for specific material types are currently present in specific shelving locations.

Additional information

For further assistance, please see our documentation on creating a query.
