If I update a Lending request from article to book in the ILLiad Client, does it change what the next library sees for the document type if I cancel the request?

Last updated: Thu, 09 Jul 2020 16:47:17 GMT

Symptom

• When you update a request in your ILLiad Client, you want to know if it will update the Document Type the next library sees if you cancel the request.

Applies to

• ILLiad

Resolution

When you change the document type in your ILLiad Client, it only changes what you see, not what everyone else sees. The next library will see the document type of the original request.
