When I am setting up the ILLiad Services, what Startup Type should we use?

Last updated: Thu, 30 Jul 2020 20:52:46 GMT

Symptom
- You want to know what startup type you should use for the ILLiad Services

Applies to
- ILLiad

Resolution
Here are the different steps you need to follow to make sure your ILLiad Services start properly:

1. All the ILLiad services should be using **Automatic (Delayed Start)**.
2. Whichever server your SQL Server is on, the **Microsoft SQL Agent** should be set for the Startup Type of **Automatic**.
