How do I set up a custom query to find out all the patrons who email address does not match my institution?

Last updated: Mon, 03 Aug 2020 18:48:20 GMT

Symptom

- You want a list of patrons who do not have an email address that is not in your domain

Applies to

- ILLiad

Resolution

Here are the instructions on how to do a Custom Search so you can find all the patrons that are not part of your domain:

1. Let's say your domain is abc123.edu, so you are looking for any patron who does not have the email address that ends with @abc123.edu.
2. You do a Custom Search under the Users search box.
3. The search would be Users.EmailAddress is not like %@abc123.edu

You should see all the patrons who do not have an email address that ends with @abc123.edu.
