When I am using an OpenURL link into ILLiad, what Web page is presented to the patron?

Last updated: Tue, 11 Oct 2022 19:05:23 GMT

Symptom

• You want to know which Web page is showing to the patron when using OpenURL

Applies to

• ILLiad

Resolution

You see the Logon2.html even though the URL shows ILLiad.dll. So if someone is getting a missing page error message when going through OpenURL, it has to do with the logon2.html. More information can be found at Default Web Pages (v9.1).

Page ID

32246
