Learn how to add links to WorldCat from Folio, using OLIB Web. Folio can display links to WorldCat in the hitlist and the title details.

Example in Folio hitlist:

1. 5k and 10k: from start to finish (2011)
   Hiditch, Graeme
   Books

2. 100 reasons to run--now!: how to jumpstart your run (2012)
   Galloway, Jeff, 1945-
   Books

3. 101 youth athletics drills (2009)
   Shepherd, John, 1951-
   Books

4. The ACL solution: prevention and recovery for sports' most devastating knee injury
   Marx, Robert (Robert G.), 1955-; Myklebust, Grethe; Boyle, Brian W
   Books

When the end user clicks the link, they are taken to the same record in WorldCat:
Title hitlist in Folio

The configuration settings required to display the link to WorldCat on the title hitlist are:

- owc_url1
- owc_url2
- owc_link_text (optional)

1. Go to OPAC> Configuration Settings.
2. Search owc to check that the above settings do not already exist.
3. Click New Record and create the settings in g_title_hitlist as shown below.

https://help.oclc.org/Library_Management/OLIB/Folio/Links_to_WorldCat

### owc_url1

This setting defines the first part of the Open WorldCat link on ISBN.

<table>
<thead>
<tr>
<th>FIELD</th>
<th>EXAMPLE</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>CONFIG BLOCK</td>
<td>g_title_hitlist</td>
<td></td>
</tr>
<tr>
<td>SETTING</td>
<td>owc_url1</td>
<td></td>
</tr>
<tr>
<td>DESCRIPTION</td>
<td>The first part of the Open WorldCat link</td>
<td></td>
</tr>
<tr>
<td>VALUE</td>
<td>&quot;<a href="http://www.worldcatlibraries.org/wcpa/isbn/">http://www.worldcatlibraries.org/wcpa/isbn/</a>&quot;</td>
<td>Enter the WorldCat ISBN permalink surrounded by double quotes</td>
</tr>
<tr>
<td>VALUE 2</td>
<td></td>
<td></td>
</tr>
<tr>
<td>VALUE 3</td>
<td></td>
<td></td>
</tr>
<tr>
<td>ALLOWABLE VALUES</td>
<td>The first component of a valid URL for the Open WorldCat link</td>
<td></td>
</tr>
<tr>
<td>SEQUENCE 1</td>
<td>29</td>
<td></td>
</tr>
<tr>
<td>SEQUENCE 2</td>
<td>0</td>
<td></td>
</tr>
<tr>
<td>INCLUDE?</td>
<td>Y</td>
<td></td>
</tr>
</tbody>
</table>

### owc_url2

This setting defines the second part of the Open WorldCat link.

There are two options for this setting:

**Location/Postcode and WorldCat icon**

The first part of this value is used to indicate your location/postcode enabling Worldcat to display the holding libraries with the ones closest to you at the top.

The second part of this value is the html code to display the WorldCat logo as the hyperlink:
<table>
<thead>
<tr>
<th>FIELD</th>
<th>EXAMPLE</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>CONFIG BLOCK</td>
<td>g_title_hitlist</td>
<td></td>
</tr>
<tr>
<td>SETTING</td>
<td>owc_url2</td>
<td></td>
</tr>
<tr>
<td>DESCRIPTION</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**VALUE**

```
"?loc=XXXX' TITLE='Find this record in WorldCat'>
<img src='https://static1.worldcat.org/wcpa/re...asthead_en.png'
alt='WorldCat' height='36'
width='104"
```

Enter surrounded by double quotes. Replace XXXX with your library postcode. This string includes the WorldCat logo.

Note: no single quote is required to close the width value, the double quote is used to close the whole value setting.

**VALUE 2**

**VALUE 3**

**ALLOWABLE VALUES**

The second component of a valid URL for the Open WorldCat link. Replace XXXX with your library's postcode.

**SEQUENCE 1**

29

**SEQUENCE 2**

0

**INCLUDE?**

Y

**Location/Postcode only**

Alternatively include only the postcode in the **Value** field - "?loc=XXXX"

With this option, you then define the hyperlink text in owc_link_text.

**owc_link_text**

Create this setting to define the hyperlink text if you are not displaying the WorldCat logo as above.

---

https://help.oclc.org/Library_Management/OLIB/Folio/Links_to_WorldCat

The configuration setting required to display the link to WorldCat on the Folio title details screen is:

https://help.oclc.org/Library_Management/OLIB/Folio/Links_to_WorldCat

In the tidetails array in g_title_details, create an output_format2 setting containing the display text, ISBN OLSTF tags and WorldCat URL link details.

1. Go to OPAC> Configuration Settings.
2. Search tidetails to check that the settings do not already exist.
3. Click New Record and create the output_format2 setting:

<table>
<thead>
<tr>
<th>FIELD</th>
<th>EXAMPLE</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>CONFIG BLOCK</td>
<td>g_title_details</td>
<td></td>
</tr>
<tr>
<td>SETTING</td>
<td>tidetails</td>
<td></td>
</tr>
<tr>
<td>DESCRIPTION</td>
<td>WorldCat link</td>
<td></td>
</tr>
<tr>
<td>VALUE</td>
<td>output_format2</td>
<td></td>
</tr>
<tr>
<td>VALUE 2</td>
<td>&quot;Link to WorldCat&quot;</td>
<td>If a label is also required, this can be added here.</td>
</tr>
<tr>
<td>VALUE 3</td>
<td>&quot;#ISNN##I1#Find this record in &lt;a href=<a href="http://www.worldcat.org/isbn/">http://www.worldcat.org/isbn/</a>&lt;IS&gt; target=&quot;_new&quot; style=&quot;font-weight:normal&quot;&gt; &lt;img src='https://static1.worldcat.org/wcpa/re...asthead_en.png' alt='WorldCat' height='36' width='104'&gt;/&lt;/a&gt;#/I1##/ISNN#&quot;</td>
<td>Enter this text to enable a link to WorldCat which includes the WorldCat logo.</td>
</tr>
</tbody>
</table>

ALLOWABLE VALUES

| SEQUENCE 1 | 4 |
| SEQUENCE 2 | 11 |
| INCLUDE?   | Y |
