How can I tell if a report has reached a row limit?

Symptom

- It is unclear whether a report has reached a row limit.

Applies to

- WorldShare Reports
- WorldShare Report Designer

Resolution

There is a 50,000 row limit within WorldShare reports.

The number of rows in a report can be found using the Export tool:

1. After running a report, select **Export** on the Main toolbar.
2. Select **Data**.
3. If the number of lines is shown as 50,000 the data limit has been reached.
4. Click **Cancel**.

If a report has reached the 50,000 row limit, add filters to narrow the data set to below 50,000 rows.

Additional information

Please see additional information on [adding filters to reports](https://help.oclc.org/Library_Management/WorldShare_Reports/Troubleshooting/How_can_I_tell_if_a_report_has...).
