Discover how to add previously ordered items to an invoice in WorldShare Acquisitions. You can add items that you previously ordered to an invoice. This process occurs on the receive and invoice screen in Acquisitions and is different than adding items that you have not ordered to an invoice. To see how to add items directly to an invoice (without ordering first), see Add items directly to an invoice (without ordering first).

**Find ordered items to invoice**

Follow these steps to find an ordered item to invoice.

1. From the left navigation, click **Receive and Invoice**.
2. Select a processing type from the Processing Type drop-down list.
   - **E-Product** - All e-products
   - **Local - One Time** - A physical or nonphysical item that does not belong in WorldCat or the knowledge base (e.g., membership, furniture, office supplies, technology, etc.) that is received in a single transaction
   - **Local - Subscription** - A physical or nonphysical item that does not belong in WorldCat or the knowledge base (e.g., membership, furniture, office supplies, technology, etc.) that is received on a continual basis
   - **Monograph** - Monographs where only one barcode is applied
   - **Serial** - Print serials and multi-part monographs where multiple barcodes are applied
3. Select **Invoice** from the Action drop-down list.
4. Click **View Items**.
5. Click the **Search Text** form field and then press `<Enter>`.
6. Find the items you want to receive and invoice.

**Find a specific item**

1. Select a **search filter** from the Search drop-down list.
2. Enter the barcode, ISBN, ISSN, OCLC number, or title, using the Search Text form field. Search results appear automatically when you stop typing.
3. To return to the list of outstanding items, delete all text from the Search Text form field.
4. Barcode searches are possible only after importing shelf ready data. See [Import invoice and shelf-ready data](#).

**Find all items on an order**

1. Select **Order Number** from the Search drop-down list.
2. Enter the full order number (PO number), including "PO" and dashes (-), in the Search Text form field. Search results appear automatically when you stop typing.
3. To return to the list of outstanding items, delete all text from the Search Text form field.
7. You may also narrow your search by one of the filters below.

Purchase Status

**View the WorldCat record for an order item**

You can view the WorldCat bibliographic record for an order item in WorldShare Record Manager or your WorldCat Discovery instance. This allows you to verify that the record for a received item is correct by:

- Viewing the metadata and, if needed, editing a record before receiving (Record Manager)
- Viewing the patron-facing record (WorldCat Discovery)

Note: This functionality does not apply to items with either of the following processing types

- Electronic Product
- Local

1. From the Receive and Invoice screen, hover over the information icon (ℹ️) next to the order item title.
2. The information pop-up window provides the following links:
   - **View/Edit Metadata** - Click to open the full MARC 21 bibliographic record in Record Manager. This link only appears if you have permission to view Metadata.
   - **View in WorldCat Discovery** - Click to open the bibliographic record in your WorldCat Discovery instance.

**Create new invoice or select invoice**

In order to receive and invoice items, you must select an invoice or create a new invoice.

**Create a new invoice**

1. From the Receive and Invoice panel, click **New Invoices**.
2. Enter the **Vendor**, **Invoice Number**, and **Invoice Date** of the invoice.
3. Click **Save**. This invoice will then be automatically selected for use and you can skip to step 7.

https://help.oclc.org/Library_Management/WorldShare_Acquisitions/Invoice/Add_previously_ordered_items_to_an...
Select an existing invoice

1. Select the vendor.
   ◦ Enter the vendor name into the Vendor search box in the left panel. As you type, a list will appear showing the vendors in use that match your search.
     - If a vendor does not appear, make sure the vendor is listed as In use in Vendors.

2. Select the invoice.
   ◦ Type the invoice number into the Invoice Number search box. As you type, a list will appear showing the vendors in use that match your search.

Add a previously ordered item to invoice

There are several ways to add a previously ordered item to an invoice.

You can invoice all copies of an order item or only some copies of an order item. Invoicing only some copies of an item will leave the order price of the un-invoiced copies still encumbered on the budget (as long as the order is of type Purchase Order).

There are five invoice item types:

• Full invoice items: These cover 100% cost of the copies being invoiced. When the invoice is paid, the entire order price of the copies is dis-encumbered.

• Partial invoice items: These cover a percentage of the copies being invoiced. When the invoice is paid, any percentage not invoiced is still encumbered for the ordered items.

• Supplemental invoice items: These cover any additional costs for an item that was already invoiced previously. You can only create a supplemental invoice item for an item whose invoice percentage is 100%.

• Credit invoice items: These allow the vendor to provide a credit that you can use to purchase future items from them.

• Refund invoice items: These are similar to credit items, but in this case, the vendor actually refunds the money paid to the library for use in any way they wish, not just to purchase items from them.

Fully invoice all copies

This describes the process for invoicing all copies of an item fully (see definition of Full invoice items at top of this section). This is the typical way of invoicing an item.

1. After finding the ordered item to invoice and selecting the invoice (see steps above), you will need to add the items to the invoice.
2. In the Invoiced column, click Add to Invoice. The Add Item to Invoice dialog window opens, with the Pay Option Pay in full selected by default.
3. Click Add in the Add Item to Invoice window. The item moves to be the new first line of the Items processed in this session. 100% appears in the invoice column.
Partial invoice items

This describes the process for invoicing copies of an item partially (see definition of Partial invoice items at top of this section). This method of invoicing is used when you are paying for an item in installments and only want part of the order price to be disencumbered upon payment.

Use this feature to not pay the invoice in full.

Partially invoice item by percentage

You can partially invoice an item based on the percentage assigned to the invoice item. The encumbrance for the copy is reduced by the percentage of the invoice item.

1. After finding the ordered item to invoice and selecting the invoice (see steps above), you will need to add the items to the invoice.
2. In the Invoiced column, click Add to Invoice.
3. In the Add Item to Invoice dialog window, select Pay by percentage for Pay Option.
4. Enter the % to be invoiced at this time or select using the arrow keys. You can select 0-100%.
5. Click Add.
   - The open Item moves to Items processed in this session area at bottom of screen.
   - The Invoiced column will display the invoice item percentage you selected.

Partially invoice item by amount

You can partially invoice an item based on the amount paid for the order item. The encumbrance for the copy is reduced by the amount paid on the invoice.

This is useful when processing items that are invoiced multiple times or in multiple parts and the price of each part is uncertain.

Note: If there are multiple funds on the order item, the encumbrance for each fund is reduced proportional to the amount or percentage allocated to that fund. For example, if you invoiced an order item with two funds with $100.00 allocated to each fund, and the invoice amount was $100.00, the remaining encumbrance for each fund would be $50.00 upon payment of the invoice.

1. After finding the ordered item to invoice and selecting the invoice (see steps above), you will need to add the items to the invoice.
2. In the Invoiced column, click Add to Invoice.
3. In the Add Item to Invoice dialog window, select Pay by amount. The amount encumbered for the item is displayed as well as a Unit Price text field.
4. Enter the Unit Price for the item being invoiced.
5. Click Add.
   - The open Item moves to Items processed in this session area at bottom of screen.
   - The Invoiced column will display --- as the item is disencumbered based on the amount paid on the invoice.
rather than on percentage.

**Invoice the same item by amount**

You can invoice the same item by amount multiple times. This is useful when processing items that are invoiced multiple times or in multiple parts and the price of each part is uncertain.

1. From the left navigation, click **Receive and Invoice**.
2. Select **Monograph** or **Serial** from the Processing Type drop-down list.
3. Select **Invoice** from the Action drop-down list.
4. Click **View Items**.
5. Select **Partially Paid** from the Purchase Status drop-down list.
6. Locate the item you previously invoiced.
7. Select **Add Debit to Invoice** from the Select Action drop-down menu.
8. In the Add Item to Invoice dialog window, the amount still encumbered for the item is displayed as well as a Unit Price text field.
9. Enter the **Unit Price** for the item being invoiced.
   Or
   If this is the final part for this item, click the **Clear encumbrance and mark copies as paid** checkbox. If you select this checkbox:
   ◦ Any remaining encumbrance for the order item will be immediately cleared and set to 0.00.
   ◦ Once all invoices are paid for the item, the resulting copies will be marked as Paid rather than Partially Paid.
10. Click **Add**.

**Invoice some copies of an order item**

This describes the process for invoicing some copies of an item, either partially or fully.

1. After finding the ordered item to invoice and selecting the invoice (see steps above), you will need to add the items to the invoice.
2. In the Invoiced column, click **Add to Invoice**.
3. The Add item to invoice dialog will appear.
4. To invoice only some copies of the item, reduce the Quantity to the number of copies you want to invoice. Choose whether you want to pay fully or installments (see instructions above on paying fully or partially). Click **OK**.
5. The open Item moves to **Items processed in this session** area at bottom of screen.

**Supplemental items**

This describes the process for creating supplemental invoice items (see definition of supplemental invoice items at the top of this section). This method of invoicing is often used when a vendor has accidentally invoiced you for less than the full price of the item. You can only use this option if the item is already 100% invoiced and paid.

1. After finding the ordered item to invoice and selecting the invoice (see steps above), you will need to add the items...
to the invoice.

2. In the Invoiced column, you will now see a **Select Action** button instead of an **Add to Invoice** button. Select the action **Supplement**.

3. In the Add item to invoice dialog, edit the Quantity and Amount.

4. On the Add Item to Invoice window, edit the Quantity and Amount.
   a. **Amount** - For supplements, enter the amount from the vendor.
   b. **Quantity** - Any number equal to or less than the total number of copies as listed here

5. Click **OK**.

6. The item moves to the Item(s) processed in this session area.
