Is it possible to set the Transcript tab to stay open instead of closed?

Last updated: Thu, 14 Jan 2021 20:12:25 GMT

Symptom

- You have a field set to appear inside the Transcript tab and you want to open that field up so users can see it when opening each record.

Applies to

- CONTENTdm

Resolution

The Transcript tab is closed by default and there is no option to force it open. You could change this behavior via a custom page with Javascript and/or CSS set to display that field as open, though.
