How can I move from one record to another in the metadata mapping tool?

Last updated: Fri, 22 Jan 2021 19:22:23 GMT

Applies to

- Digital Collection Gateway

Answer

If you want to move between the records one at a time, you can click on the arrow in the upper right corner under the Approve map and sync button. If you'd like to skip to a specific record in the collection, click the Go to OAI ID button and type in the OAI Identifier.

Additional information

There is more on editing the MARC map for Digital Collection Gateway collections.
