Is it possible to get a CONTENTdm collection restored to a prior date?

Last updated: Wed, 02 Nov 2022 14:41:53 GMT

Applies to

• CONTENTdm

Answer

A backup of CONTENTdm servers is created at the end of each day, and these backups are retained for a 42-day period. Either a specified collection or the full site can be restored to a date within this window by providing the following to OCLC Support:

• CONTENTdm server ID
• collection alias (if only one collection needs restored)
• the date to which the server/collection needs to be restored
