Why is a catalog search not returning expected results in Capira?

Last updated: Thu, 15 Apr 2021 15:07:37 GMT

Symptom

- Searches are not returning expected results

Applies to

- CapiraMobile
- CapiraReady

Resolution

Please contact OCLC Support with the parameters used so may troubleshoot the connection between your OPAC and Capira. These parameters would include the search query phrase, and any limiters selected for Material, Format, Library, Sort, Collection, etc.

We also ask that you provide us with what titles are missing from the search, as well as a link to the expected search in your OPAC.
