Is it possible to apply more than one Custom Holdings Path to a request?

Last updated: Wed, 24 Feb 2021 17:57:23 GMT

Applies to

- Tipasa
- WorldShare ILL

Answer

It is not possible to add more than one custom holdings path. You would need to add your first chosen path, then add additional libraries individually.

Another option is to wait to confirm if the request is fulfilled with the first path. If the request cannot be fulfilled by the libraries in the initial custom holdings path, you would need to resubmit with the second path.
