How do I move the Merge menu pop up window in Connexion client.

Last updated: Mon, 22 Mar 2021 14:02:53 GMT

Symptom

- The merge menu goes "off-camera" or out of focus and needs moved on to the screen.

Applies to

- Connexion client Merge menu option

Resolution

You can use your keyboard to move a particular window to a certain spot onscreen. First, press Alt+Tab to pick the window you want to move.

When the window is selected, press Alt+Space to open a small menu in the upper-left corner. Press the arrow key to select "Move," and then press enter.

Use the arrow keys to move the window where you want it on screen, and then press Enter.

This works even if the window you want to move is hidden and you can't find it with your mouse.
