How does the "Logon As User" button work in ILLiad?

Last updated: Tue, 11 Oct 2022 15:40:20 GMT

Applies to

- ILLiad

Answer

The Logon As function is determined by the StaffProxyWebUrl key in Customization Manager. If this key is changed, it can affect what is seen using the Logon As function.

Additional information

Signing into a User's Web Account from the Client

Make sure the StaffProxyWebURL Key has a value that points to the TestWeb address like this example:
https://illiadaddress.site.edu/ILLiad/TestWeb/
