How do I change the order branch holdings display in WorldCat Discovery search results?

Last updated: Fri, 14 May 2021 12:28:48 GMT

Applies to

- WorldCat Discovery

Answer

Please contact OCLC Support with the branch order you would like to display and your library’s OCLC Symbol.

Your library will need to have branch scoping configured, if you would like this order changed.

Note, changing the branch scoping order, also changes the order the availability information displays on the record in WorldCat Discovery.
