What role does my WorldShare account need in order to assign course reserve roles to other accounts?

Last updated: Thu, 20 May 2021 18:55:21 GMT

Applies to

- WorldShare Admin

Answer

In order to assign course reserve roles, an account must have the course reserves manager role assigned to it. If you need to have that role assigned and do not have a course reserves manager account from which to assign that role, please contact OCLC support.

Additional information

Find the Course Reserves authorization roles available in the Admin module and compare the actions available for each role.
