Include Request ID with problem reports

When reporting an issue with WorldShare Interlibrary Loan, it's very helpful to include the Request ID. Including this information allows us to directly trace what happened on the request we are troubleshooting.

New features and enhancements

Improve citation accuracy and streamline workflows with the new PMID lookup feature

A new PubMed® unique identifier number (PMID) citation lookup feature is now available to libraries with WorldShare ILL or Tipasa. This feature improves citation accuracy and streamlines ILL workflows. Please note that this functionality was installed in an interim release and is currently available.

When a request includes a PMID, a magnifying glass displays next to that field in Request Details.
You can then click the magnifying glass to view citation details from PubMed’s database. If you wish to overwrite the existing information in the request with the PubMed citation details, click Apply and Save.

When you use automation, it’s even faster. Rather than clicking Send Request, choose Send to Automation so that the request will be matched to a bibliographic record and libraries holding the requested item. Along with the accurate PubMed citation information, the smart lender string built by automation will ensure that your library user gets the item even quicker.

For more, see Create and Edit Requests.

**Bug fixes**

You will now see the correct time to respond value in the time to respond column. Previously, when the request was submitted to the first lender in the lender string on a weekend, <12 appeared 24 hours early. Please note that this was a display issue and did not affect request aging.
